

THE CIRCLE OF LIGHT

GOING ZERO

Committing to carbon neutral

We are excited to announce that our Australian manufacturing facility is now fully solar powered. Not only do we generate enough energy to run our huge machines and all our other needs, we actually make enough to contribute alot back to the electricity grid.

As manufacturers we have a big role to play in protecting our planet, so Luxxbox has committed to moving to carbon neutral.... to GOING ZERO

So while we're not there yet, this is a huge step on our journey.
